DETAILED ACTION

This application filed January 22, 2002, is a continuation of 09/142,569, filed April 2, 1999, now US Patent 6413735, which is a national stage entry of PCT/US97/04193, filed March 14, 1997, which claims priority to provisional application 60/013958.

Applicant's amendment filed January 22, 2002 has been received and entered. Claims 1-64 have been canceled. Claims 65-74 have been added. Claims 65-74 are pending and currently under examination.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: the antibody claimed has the ability to bind to variety of molecules as set forth in claim 66. Each of the molecules recited in claim 66 may be related to SEQ ID NO: 4 however they represent variations of SEQ ID NO: 4 therefore different molecules. Moreover, variants, analogs, homologs and derivatives would be different from SEQ ID NO: 4 or fragments thereof, therefore providing an antibody that binds to SEQ ID NO: 4 or fragments thereof would not provide the same antibody that binds to the variations of SEQ ID NO:4 comprised by variants, analogs, homologs and derivatives.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 65, 66 and 68-74 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1632

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
